Exports Globally... To over 50 countries

Global Challenges Zeigler Brothers have found exporting increasingly challenging with application of new and changing regulation that not only concerns food & feed safety, but also the protection of many countries' participation in the global market.

"As participants in a huge global trade industry, we recognize the value The World Trade Center brings to keeping our company abreast of the changes and challenges of Global Trade and Finance."

A few "Fun Facts"

- Zeigler Bros. developed feeds for the first rats in space utilizing toothpaste-type technology that was not affected by loss of gravity.
- Zeigler Bros. has a longstanding partnership with the Smithsonian Institute and has developed numerous projects including tortoise and manatee diets.
