Profile...

Gannett Fleming is a global infrastructure firm that provides planning, design, technology, and construction management services for a diverse range of markets and disciplines. With 2,000 highly qualified individuals across a global network of 60 offices, we are united in our passion to deliver excellence. We have played a part in shaping infrastructure and improving communities in more than 65 countries, specializing in transportation, environmental, water, energy, and facility-related projects.

Water management , Kuala Lumpur, Malaysia

Founded in 1915, Gannett Fleming embraces sustainability and innovation in their projects and internal activities, achieving results while being responsible stewards of the environment. Their culture of service, ingenuity, and responsiveness empowers them to fulfill their key mission: make their clients successful. Gannett Fleming is consistently ranked in the top 10 percent on *Engineering News-Record's* Top 500 Design Firms list.

Fun Fact: Their first overseas venture began in the late 1920s when, with their partners, they acquired more than 112 electric utilities in Chile, Argentina, and Brazil. They went on to manage these properties and handle all of their design and construction work.

We are WTC Members because...

"We have the opportunity to network with business, government, and diplomatic leaders who influence international trade development and economic growth. As a global infrastructure firm, we value these connections and appreciate the WTC's newsletter and events, which help us to stay on top of global market trends and international political and economic issues. At the same time, we have served as speakers and discussion leaders at WTC events, facilitating dialogue. As one of the only consulting engineering firms that are WTC members, we are in a unique position to introduce our services to the international business community and support WTC initiatives related to the engineering consulting sectors."
