## Harrisburg International Airport

**Founded:** 1969

**Location:** Harrisburg, PA

**Year Joined:** 2008

### Key Contacts:

Scott Miller, Deputy Director, Business Development & Strategic Marketing

Jaime Rowe, Marketing Assistant

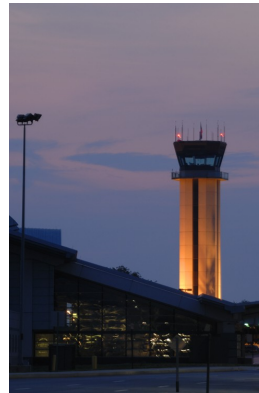

[www.flyhia.com](http://www.flyhia.com)

**Services:** Harrisburg International Airport is well positioned with freight-forwarding capabilities through two major cargo shippers .

**Global Challenges:** Our biggest global challenge is the perception that you always have to drive hours each way to an airport in Philadelphia, New York and/ or Washington DC to fly internationally. In 2013, more than 200 international travelers each day arrived and departed Harrisburg International Airport ( MDT ) on flights provided by Air Canada, American, Delta, United and US Airways. The five most popular countries for international travelers to/from MDT were Canada, Mexico, the United Kingdom, China and Germany.

### Profile...

**The Harrisburg International Airport (MDT)** is located in Middletown, PA, and serves Central Pennsylvania regions such as Hershey, York, Gettysburg, Lancaster, and Harrisburg. While the Federal Aviation Administration ( FAA ) booking code is MDT, this also stands for the Money, Distance, and Time you could save by flying out of HIA. HIA provides great passenger services such as free WiFi throughout the terminal, the Susquehanna Club for HIA frequent flyers, and several food and beverage vendors. HIA is the only multimodal, intermodal international airport servicing south-central Pennsylvania with more than 1,400 employees and six airlines. As the third - busiest passenger and cargo airport in Pennsylvania, HIA offers daily nonstop service to 13 destinations and hundreds of connection points worldwide.

### We are WTC Members Because...

" We want to broaden awareness of the airport and the services provided by our tenants. In addition, the WTC is a valuable resource for us to learn about the growing air travel needs of WTC members related to passenger and cargo activity. "
