**Light Refreshments
 Provided**

World Trade Center Harrisburg and MANTEC have partnered on a series of company tours showcasing our members and clients who excel in international trade and innovation. Join us and learn more about the Klinge Corporation and their successes and challenges in competing in the global marketplace.

Klinge Corporation has been a leading global provider of specialized ISO refrigerated and freezer containers and generator sets for 30 years. Klinge Corporation's customized designs offers robust alternatives to standard, mass-produced refrigerated containers which often cannot meet the requirements of harsh environments or stringent testing. Through their commitment to innovation, Klinge was the first to introduce both electronic and microprocessor controllers, and the first to offer units with more environmentally friendly refrigerants. Klinge Corporation also partnered to help start local production companies in York, such as Hydraulico and RTI.

Participation is limited, so register early to reserve your spot!
